

# GLS LIGHTING AND CONTROLS SPOTLIGHT

**Illuminating the way for innovation in LED lighting technology.**

KKDC was founded in 2003 as a small LED lighting and IT company in South Korea. After two years, founder Jack Choo moved his family and KKDC to Sydney, Australia to integrate KKDC more firmly into the worldwide Architectural Lighting Industry.

Today KKDC Lighting is an established worldwide company with branches in Asia, Australia, Europe, and North America. The company manufactures interior and exterior illumination with best in class architectural forms, optical control, glare reduction, and light engine options.

Designers have choice of color temperature, color accuracy, optical control within each series of KKDC products. Each series of KKDC linear illumination or spot illumination offer particular architectural impact for a full palette of designer tools to illuminate any environment.

Check out their [website](#) for more product information.
